

NOTICE

The Route 28 Corridor Improvements Project Team is pleased to announce that the
WESTFIELDS BLVD. INTERCHANGE at ROUTE 28

is

OPENING TO TRAFFIC

the

WEEKEND OF OCTOBER 7TH, 2005

Beginning Friday, October 7th after the morning rush hour, crews will begin switching Westfields Blvd. traffic to the new bridge over Route 28. The existing signal at Route 28 and temporary intersection will be removed at that time. Crews will work non-stop through the weekend to complete construction of several loop ramps that cannot be completed until traffic is switched to the bridge. All ramps should be open to traffic by the Monday morning rush hour.

During the weekend, several DETOURS will be in place while the loop ramps are completed. These are shown on the attached map and include:

#1 - No access from northbound Route 28 to westbound Westfields Blvd.

A marked DETOUR will be in place directing traffic to use Willard Road or use alternate routes.

#2 - No access from westbound Westfields Blvd. to southbound Route 28

A marked DETOUR will be in place directing traffic to use Walney Road or use alternate routes.

For more information on the project, please see our website at www.28freeway.com.

On behalf of the Project Team, we appreciate your patience over the past year and look forward to a major improvement in traffic congestion once the interchange is open.
